YEONGTAEK LIM

yeongtaek1337@gmail.com · Seoul, Republic of Korea · yeongtaek-lim.github.io

RESEARCH INTERESTS

Computational Social Science; Online Conflict and Political Polarization; Social Fragmentation; Social Impacts of Generative AI; AI and the Future of Work; Computational Text Analysis and Social Network Analysis

EDUCATION

Korea Advanced Institute of Science and Technology (KAIST) Feb. 2026
M.S., Digital Humanities and Computational Social Sciences | *Data Science minor*

- Track: Computational Social Sciences Major GPA: 3.85/4.30; Cumulative GPA: 3.67/4.30
- Advisor: Prof. Lanu Kim
- Thesis: *The Power of Entry Pathways: A Study of Professional Comparison Discourse in a Korean Online Community* (in English) [KAIST Library]
- Collected and analyzed 5,547 posts (Jul. 2017 – Dec. 2024) from Blind, an anonymous Korean workplace community, mentioning two or more of 18 legally defined professions (7 school-based, 11 test-based), alongside occupational information data. Found that occupational similarity predicts how often professions are compared and that a shared entry pathway adds explanatory power (adjusted R^2 from 0.301 to 0.325); entry pathway also differentiated expressed emotions and whether professions were compared in career or marriage boards.
- Relevant coursework: Bayesian Statistics for Computational Modeling and Data Analysis; Statistical Data Science Practice; Programming for AI; Programming for the Humanities and Social Sciences; Natural Language Processing for the Humanities and Social Sciences.

Korea National University of Arts Feb. 2023
B.F.A., Art Theory | *Cinema Studies minor* Major GPA: 3.91/4.30; Cumulative GPA: 3.88/4.30

- Relevant coursework: Creative Thinking with Coding; New Media Art; From Cinema to New Media.

RESEARCH EXPERIENCE

Korea Information Society Development Institute (KISDI) May 2026 – Present
Researcher, AI Transition and Global Structural Change Supervisor: Dr. Aram Moon

- Developed a RAG-based LLM pipeline to estimate AI automation potential for 60,000 occupational records. Used ILO ISCO-08 exposure estimates (Gmyrek et al., 2025) as reference data and occupational similarity to inform scoring ($r = 0.88$ between occupational and score similarity); reduced an estimated month-long labeling process to two days.
- Managed structured AI exposure estimates and conducted statistical analyses of occupational variation; currently comparing scoring consistency across language models (ChatGPT, Claude, Gemini) over repeated runs.

Korea Advanced Institute of Science and Technology (KAIST) Feb. 2024 – Feb. 2026
Research Assistant, Computational Analysis of Technology and Society Lab Supervisor: Prof. Lanu Kim

- AI and Financial Professions (May – Oct. 2025): Conducted semi-structured interviews with finance and finance-adjacent professionals on their experiences with AI tools (12 interviews, Jul. – Sep. 2025); the study was published as Chapter 6 of a Korea Labor Institute report (Noh et al., 2025).
- Medical AI Research Literature (May–Oct. 2024): Analyzed 31,804 English-language medical AI papers from OpenAlex (2010–2024) with a 12-topic structural topic model and a three-period comparison. Identified a shift toward applied research: the medical imaging/deep learning topic grew from 1.8% (2010–2014) to 24.2% (2020–2024) of topic share, while cell and molecular biology fell from 25.0% to 4.5%; contributed findings and written analysis to a KISDI policy research report (Kim et al., 2024).

Korea Press Foundation Apr. – Nov. 2025
Research Assistant, AI Use and Inequality: Focus on AI Literacy
Supervisors: Dr. Soeun Yang and Prof. Byungjun Kim

- Built Meta4AI, a chatbot on the Claude API with planted errors and bias across three tasks, for an observational study of AI literacy; deployed it to an online panel (270 completed, 224 valid chat logs) and managed the resulting study data.

- Use scores were near ceiling (94.8–97.1% by task), while 85.2–94.3% scored zero on evaluation, the measure of catching the planted errors and bias (Yang et al., 2025, Korea Press Foundation).

Korea Information Society Development Institute (KISDI) Jul. – Oct. 2024
Research Assistant, AI Skill Demand Analysis Using a Skill Value Chain Framework
Supervisors: Dr. Hyunkyung Lee and Prof. Byungjun Kim

- Collected AI-related job postings (373 from company websites, Jul. 2024; 1,774 position-level records from aicareer.co.kr, Aug. 2024) and applied structural topic modeling (STM; 11 topics; degree, experience and STEM-major covariates) and word-frequency analysis to identify in-demand occupational skill sets; 9 of 11 topics matched Lightcast AI skill clusters (Stanford HAI AI Index).
- Findings presented by Dr. Hyunkyung Lee at the 2024 Research Symposium on ICT-Based Solutions to Social Issues, affiliated with the Ministry of Science and ICT (proceedings, pp. 72–93).

HONORS, AWARDS, AND SCHOLARSHIPS

Third Place (Team Korea), Singapore AI Safety Red Teaming Challenge, IMDA, Nov. 2024 (Selected to represent South Korea)

Excellent Teaching Assistant Award, KAIST, Sep. 2025

Outstanding Poster Presentation Award, 14th Korea Internet Governance Forum, Jul. 2025

Support Scholarship, KAIST, Spring 2024 – Fall 2025

Academic Performance Scholarships (four semesters), Korea National University of Arts, 2016 – 2018

PUBLICATIONS AND PRESENTATIONS

Research Reports

Kim, L., Jeon, J., Kim, T., Han, M., Park, D., **Lim, Y.**, & Jung, K. (2024). *Advances in Artificial Intelligence and the Changing Meaning of Work in the Future* [인공지능의 진전과 미래 일의 의미 변화에 따른 대응 방안] (Digital Transformation Megatrends Research IV). Korea Information Society Development Institute (KISDI). In Korean. https://library.kisdi.re.kr/$/10230/contents/3934580

Presentations

Lim, Y., & Choi, J. (2025). "An Analysis of the Ambivalence within 'Equalism' Discourse." Poster presentation, *14th Korea Internet Governance Forum*, Seoul, Korea. In Korean. [Outstanding Poster Presentation Award]

- Led the project and data collection for a 9-topic structural topic model of 2,339 DCinside posts and 8,576 comments on "equalism" (2017–2024); topic modeling and analysis by J. Choi.

Lim, Y. (2025). "For Invisible Data" [보이지 않는 데이터를 위하여]. Invited talk, *academic seminar associated with the Daejeon Science Art Biennale*, Daejeon, Korea. In Korean.

TEACHING EXPERIENCE

HSS.50100 Artificial Intelligence and Critical Theory, KAIST | *Teaching Assistant* Spring 2025

- Redesigned the student presentation format to encourage participation; received the KAIST Excellent Teaching Assistant Award (Sep. 2025).

HSS.20130 Science, Technology and Society, KAIST | *Teaching Assistant* Spring 2024

- Delivered a guest lecture, facilitated classroom Q&A, and graded course assignments.

LEADERSHIP AND SERVICE

Department Student Representative, KAIST Spring 2025

- Represented the program's graduate students; received the KAIST Scholarship for Student Union Leaders.

PROFESSIONAL EXPERIENCE

Biove | *AI Researcher* Oct. – Nov. 2026

- Designed and implemented the AI architecture for Inhwa Yeom's XR installation Chandra Chronicles: In Neuroverse, shown in the Hanwha × Anthropic Art Commission at Centre Pompidou Hanwha (Oct. – Nov. 2026).

ADDITIONAL ACADEMIC TRAINING

The 11th KOSTAT–UNFPA Summer Seminar on Population — Demographic Analysis: Methods and Tools in R, Seoul, July 2024 (completed).

Linear Algebra; Calculus for Machine Learning — DeepLearning.AI / Coursera

SKILLS

Methods: Machine learning; natural language processing (NLP); social network analysis; LLMs and RAG; computational text analysis (topic modeling, text embeddings); Bayesian modeling; qualitative interviewing

Programming: Python, R, SQL

Languages: Korean (Native), English (Advanced; IELTS 7.5), Japanese (Advanced), French (Intermediate; DELF B1)
